

## ANDREW BROMBERG | AEDAS

Central to Andrew Bromberg's work in the design of built environments is an underlying philosophy that values *Human Sustainability* as a vital element, key to the success of each project. Andrew aspires toward *Enrichment*, recognizing it as fundamental to the viability of a project, as well as its influence on its surroundings and on those who come in contact with it.

Educated with degrees in Environmental Design, Architecture and Cultural Geography – Andrew's passion toward how man and nature co-exist took him on a journey of significant travels and to his migration to Asia in 2001. The densities of the Asian cities offered conditions which allowed him to balance environment and participant together – responding to the projects' surroundings from where he draws inspiration.

Without compromising the more altruistic qualities, and understanding his work is not conventional, his projects are optimized to ensure their viability. Andrew's work has a strong civic ambition and a true aspiration to make a positive contribution to the world.
